MEASURING INSTUCTIONS
GENERAL All measurements should be neat not too tight to gather skin, nor so loose that the tape slips.
Arm The right arm raised for measuring. Measure wrist just above knuckle. Measure forearm and bicep around fullest part of muscle. Measure elbow around joint.
Top of Arm Measure with arm horizontal, under arm and around on top of shoulder.
Chest Measure with arms at sides, lungs relaxed, above nipples and just below shoulder socket.
Waist Measure at narrowest part of stomach relaxed.
Buttocks Measure around widest part of buttocks.
Thigh Measure at highest point of crutch. If taken over clothing ensure pockets are empty and take firm measurement.
Knee Joint Measure around joint of knee.
Calf Measure around fullest point of muscle.
Ankle Measure just above knuckle.
Collar Bone to Crutch Measure centre point of collar bone to underneath centre of crutch.
Inside Leg Measure must be taken at highest point of crutch to just above ankle knuckle.
Height Accurate measurement is essential to all types of suits.
NOTE! NO RESPONSIBLTY ACCEPTED FOR WRONG MEASUREMENTS.
